

Bizhub 284e Scanning

On the printer select the Fax/Scan button, tap Address Book, tap All, scroll until you see `dwd.scan`, select `dwd.scan` and `dss.metp`, hit the start button. If it will not allow you to select both locations at once, you will need to do individual scans for each.

To see if the scan completed successfully, select Job History it will show if the scan did not go thru
